## Telex MTRBi DM 3600 MOTOTRBO Interface

Integrated Platform includes output to Google Earth

The MTRBi unit fits between the IP-223 and a Motorola DM3600 mobile. This interface provides C-Soft Software based consoles control of Motorola MOTOTRBO radio systems.

This means C-Soft systems are now able to take advantage of a complete array of digital functionality with great ease of use on a reliable platform.

As expected from a Telex product, the MTRBi unit provides a very cost effective platform, but also ensures efficient scalability when expansion is required.

The MTRBi unit supports Analogue, Digital, and Capacity Plus systems, and C-Soft allows GPS/GIS location and tracking via Google Earth.

MTRBi has been designed to allow easy incorporation into an existing C-Soft/IP-223 setup, which makes migration to a digital MOTOTRBO platform even easier.

### PRODUCT SPECIFICATION

Power - 12VDC 70mA(IP-223)

Weight - 220g

Dimensions (W x H x D) -  
86 x 37 x 100mm

Frequency Response -  
50-20kHz

Interfaces - USB v1.1 & 2.0  
RS232  
Tx/Rx Audio

Specifications are subject to change.

Cyfas offer customisation and installation services if required.

All products have comprehensive warranty and optional technical support.
